What is Body Sugaring ?

Body Sugaring is an ancient form of hair removal using a paste made of sugar, lemon and water. The paste is applied against the direction of hair growth and flicked off in the direction of hair growth. This leads to full removal of the hair follicle. Benefits include finer regrowth, sparser hair and permanency over time. Less painful than wax and helps with irritation and ingrowns generally seen from other hair removal methods such as shaving. Results last 4-6 weeks.
